

Site 1: PUBGx, northwest of Troy and Hanna - located south of Pleasant Run
Excavated borrow pit – hydrologically connected to Pleasant Run, but isn't wetland

Site 2: PUBGx, southwest of Southern Ave/Bluff Road – located north of Pleasant Run
Excavated borrow pit – most likely is hydrologically connected to Pleasant Run, but isn't wetland.
There may be some natural wetlands in the SE corner – forested area.

Site 3: PUBGx, east of Bluff Road, S of Gimber Ct.

Excavated borrow pit – Hydrologically connected to Pleasant Run via culvert under Bluff Road through tributary stream that flows west and then piped north with open outlet to Pleasant Run. There are some natural wetlands in this area, and the area will soon be a mitigation site (wetland mitigation) for flooding in Frog Hollow. For more info, contact Brad Baldwin (IDEM) or Sarah McKeown (USACE) – they are the permit contacts.

Site 4: west of Sloan Ave, east of Sherman. PUBGx.
Appear to be detention basins. Not wetland.

Site 7 - East of the intersection of Irvington Ave and Lexington Ave. PUBGx.
Is not wetland – currently is lawn.

Site 8 – west of Shadeland, north of Bonna Ave, S of Pennsy Trail. PUBGx.
Appears to be excavated pond. Not wetland.

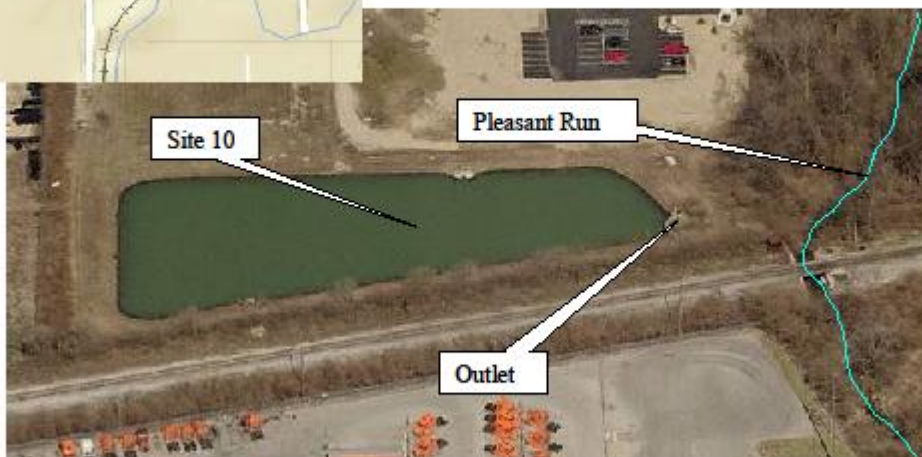

Site 9 – PUBGx – located northwest of the intersection of Shadeland and I-70.
Appears to be a borrow pit/detention basin and not wetland.
Natural wetlands may be present in NW corner.

Site 10 – south of 30th St, east of Shadeland, west of I-465

Hydrologically connected to Pleasant Run. Not wetland. Appears to be detention.

Site 11 and Site 12 – north of the intersection of 30th and Tobey. Both are PUBGh. Appear to be detention basins. Both drain north and across 33rd St. Not wetland.

Site 13 – located west of I-465 and north of 30th St – PUBGx

This is an in-stream pond. There are wetlands on this site, although the open water area is not a wetland. This is a proposed Caterpillar Co. expansion on this site that may involve wetland fill or impacts to this pond in the near future. American Structurepoint has completed a wetland delineation for the property.

Site 14 – located NE of the intersection of 34th and Shadeland – PFO1Ah
There is nothing here except for the existing building. No wetlands are present.

Site 15 – Located on the north side of Raymond, between Sherman St. and Sloan Ave.

Not shown as a NWI wetland.

Appears to potentially be used as “dry detention” for overflow events or flood events. Although maintained (mowed), portions of this area appear to be natural wetland. There also appear to be natural wetlands to the west, although a portion of this appears to be actively being filled (potentially a wetland violation).

Potential Wetlands shown in blue
